COURSE STRUCTURE

There are 7 modules in this course to be completed. Each module has been designed as a progressive step so that you are learning by doing. You will be presented with Projects and Assignments in each module in which you will be assessed, plus a final exam, which is carried out online through our Online Campus.

MODULE ONE: Design for Communication

In this first module, you are going to look at and understand all about what visual communication is and how it works before putting everything into practice. You will also learn about additional elements which will extend the skills you already have as a graphic designer.

MODULE TWO: The Creative Design Process

One of the most important modules in this Diploma Course. Being able to develop your own design process that works will become very valuable to you. In this module, you will work very closely with your Design & Training Coach on a number of projects and be shown how to develop this unique design process and what you will need to include so that it works for you.

MODULE THREE: Page Layout + Design Styles

As a graphic designer, you should already know about the basics of page layout, but here you will take this to another level by breaking some of the rules. You will be encouraged to experiment with other techniques to create impact and creative styles which will become your very own.

MODULE FOUR: Common Design Projects

Taking what you have learned in Modules 1, 2 and 3, you are now going to approach some of the common design jobs designers are faced with on a day-to-day basis, but this time you are going to look at these from the visual communication spectrum. Now your skills and imagination will be stretched to their limits.

MODULE FIVE: Corporate Identity Design

You have more than likely worked on several Corporate ID projects in the past. But here we will work on a number of projects which will provide more meaning and reason for designing an effective Corporate ID design that will stand out alongside your client's competition.

MODULE SIX: Brand Identity Design

What is Branding Design? This module is a complete course in itself and will build your confidence in understanding, designing, developing and delivering branding designs. Throughout this module, you will work with your Design & Training Coach on research techniques and live projects.

MODULE SEVEN: Digital Photography + Image Creation

Now we are going to extend your skills even further. Taking control of the photography within your design projects will build your creative techniques extensively. You will not only be able to capture your visual messages with the use of the camera, but also extend your presentation skills.

On successful completion of this short course, you will be awarded our Specialist Level 4 Diploma Certificate. You will also be given a one-year free registration as a Professional Graphic Designer with the PGDA (*The Professional Graphic Designers Association*).
